There was a generalized error in the units of the Supplemental files. The output files and scripts to run the model indicated units of $\text{g C m}^{-2} \text{yr}^{-1}$, while it should have been $\text{mg CH}_4 \text{m}^{-2} \text{yr}^{-1}$. This applies for the following files:

- Folder: Model scripts:
 - MeMo_v1.1_oneyear_example.R
- Folder: Model outputs:
 - MeMo_1990-2009_monthly.nc
 - MeMo_2000_annual.nc
 - MeMo_2000_monthly.nc
