

## Requirements

---

- stRE1 Mass shall be conserved in each single time interval.
  - stRE2 The interpolated function shall preserve non-negativity.
  - stRE3 The boundary transitions shall be continuous.
  - soRE1 The interpolated function shall remain monotonic where input data are.
  - soRE2 Symmetric structures shall remain symmetric.
  - soRE3 The interpolated curve shall be realistic and accurate.
  - soRE4 The algorithm shall be computationally efficient and easy to implement into the existing framework of the FLEXPART model.
-
