In the published article the “Author contributions” section
was submitted as incomplete and appears as follows:

RM designed the study, wrote the code, performed
the experiments, and analyzed the results. VR and
EC developed the variational data assimilation. JW
and RK developed the model output used for de-
veloping the surrogate. PB and BL assisted with
the development of the surrogate model and algo-
rithms. IF participated in the model analysis and
development of the manuscript.

This section should appear as follows, with the addition of
GM in the final sentence:

RM designed the study, wrote the code, performed
the experiments, and analyzed the results. VR and
EC developed the variational data assimilation. JW
and RK developed the model output used for de-
veloping the surrogate. PB and BL assisted with
the development of the surrogate model and algo-
rithms. IF and GM participated in the model anal-
ysis and development of the manuscript.
