land yield
land life multiplier from land yield
inherent land fertility
water stress to land yield factor
processing loss
land yield multiplier
average life of land normal
water stress
food production
average life of land
Food Stock
land erosion rate
land fertility regeneration
food import/export
food consumption
grain planting area
international food price
Population
per capita food consumption
grain to crop planting ratio
land fertility
erodabe land
<Time>
expected food stock
crop planting area
land fertility degradation
food stock coefficient
normal grain-crop ratio
net arable land
food price
food price change
willingness to increase grain planting area
land yield technology
land fertility regain time
agricultural land
willingness to increase multi-cropping index
multi-cropping index
land yield technology change rate
fertilizer subsidy
land fertility degradation rate
normal cropping index
<food production>
desired food self-sufficiency ratio
<food consumption>
land yield tech change rate multiplier
food self-sufficiency ratio
perceived food self-sufficiency ratio
