desired energy capital under construction
expected output growth rate
<Gross Output>
energy construction delay
indicated energy capital completion rate
energy supply line correction
energy capital lifetime
Energy Capital under Constr
Energy Capital
desired energy capital order rate
energy capital order rate
energy capital completion rate
energy capital discard rate
energy capital correction
desired energy capital
energy consumption
energy production pressure effect
desired energy share
energy stress
energy resource share
energy production
energy requirement
Energy Resource Remaining
Cumulative Energy Production
total aggregate energy requirement
energy resource coeff
effective energy capital input effect
energy resource ratio
Gross Output
energy consumption per unit GDP
energy resource elasticity
energy capital share
init resource remaining
effective capital intensity
effect of energy technology on energy consumption
energy technology
relative variable energy intensity
Autonomous Energy Technology
Cumulative Energy Investment
auton energy tech chg rt
<energy capital completion rate>
endogenous tech fraction
indicated energy technology
induced energy technology
auton energy tech growth rate
low lim energy tech
<Energy Capital>
energy scale economy
energy learning coeff
init cum energy investment
energy scale coeff
