

Plume for chosen PP at time t

Background for random PP and time t . Anthrop. fluxes for random PP and time t

$$\times p \sim U(0.25, 2)$$

$$+ b \sim U(-3.5, 3.5)$$

$$\times a \sim U(0.33, 3)$$

$$+ \mathbf{G}_{Nx \times Ny} \sim N(0, 0.7)$$

XCO₂ field

Concatenation

Normalisation

Core CNN model processing

Winds and additional fields corresponding to chosen plume

Backpropagation

$$\text{Loss} = \frac{pred - p \times y_{\text{truth}}}{p \times y_{\text{truth}}}$$
