Maximum runtime speedup of the FVWAM between the graph communication topology without reordered processes and the point-to-point communication

Maximum runtime speedup of the FVWAM between the graph communication topology with reordered processes and the point-to-point communication

Average runtime speedup of the FVWAM between the graph communication topology without reordered processes and the point-to-point communication

Average runtime speedup of the FVWAM between the graph communication topology with reordered processes and the point-to-point communication
