Dear reviewers,

Thanks very much for the comments on the model description update. I was unsure as to an appropriate format for this information, so it's good to see that others basically agree with my approach.

All your suggested additions are useful, and I'll incorporate them all into a resubmitted manuscript for GMD. As with the 2008 FAMOUS description (Smith et al., Geosci Model Devel 1, 2008) paper, I will include model climatology data as supplemental material to allow interested readers to view whatever details they please.

thanks for your input,

C1416

Robin Smith
