Received and published: 29 May 2011

Dear Authors,

3 reviewers have posted comments to your paper. All reviewers found your paper relevant and of interest. The reviewers asked for further clarification on the implementation and performance of coupling with MESSY. The second part of the paper, evaluating the results of the coupled model, could be included as a demonstration of the coupled model performance.

I would like to ask you to prepare and upload a revised manuscript with a focus on those remarks and respond to the 2 additional reviews.

Best regards, Wilco Hazeleger
