

Interactive comment on “Pre-industrial and mid-Pliocene simulations with NorESM-L – AGCM simulations” by Z. Zhang and Q. Yan

Anonymous Referee #2

Received and published: 5 July 2012

Dear Mr. Zhang,

I just noticed another small (but important) error that I missed before. Could you recheck this sentence?

Page 1212, line 12-14: To clarify the sentence, I would rewrite it: "If on the other hand the pre-industrial experiment is chosen as the reference, the mid-Pliocene globally and annually averaged SAT increases by 2.7 deg C", which is 8% larger.

I think instead of 'SAT increases "by" 2.7 deg C' the text should be 'SAT "anomaly" increases "to" 2.7 deg C'.

I am glad that my remarks were helpful to you.
