I thank you very much for your comments on our paper.

You basically support the new model in our paper; hence, I only discuss and reply to the following two points that you suggest for us to revise in the paper.

- 1) To add two or more recent references in the introduction: We will surely do as you suggested. Actually, we found several recently published papers in this issue.
- 2) To check and improve the language of the paper: we will check the paper thoroughly before we submit the paper to GMD for publishing.
