

Interactive comment on “Speeding up a Lagrangian ice microphysics code” by S. Unterstrasser and I. Sölch

J. C. Hargreaves (Editor)

jules@jamstec.go.jp

Received and published: 12 November 2013

Dear Drs Unterstrasser and Sölch,

I am not an expert in ice microphysics so am grateful to the reviewers for their thorough reviews.

In general the manuscript requires more background context, more details of the computational/numerical details, and more evidence of the robustness of the results, including discussion of their more general applicability. Please also respond to the interactive comment by I. Honkonen.

I look forward to receiving your revised manuscript in due course.
