Interactive comment on "An online trajectory module (version 1.0) for the non-hydrostatic numerical weather prediction model COSMO" *by* A. K. Miltenberger et al.

P. Seibert (Referee)

petra.seibert@univie.ac.at

Received and published: 18 April 2013

1. Seibert, P.: Convergence and accuracy of numerical methods for trajectory calculations, J. Appl. Meteorol., 32, 558–566, 1990.

   The publication year is **1993**, not 1990.

2. Figure 1, there is one connector that goes from "IF traj in my domain" directly to another decision box with the same question. Probably it should skip it and go directly to recalculation.

3. Figure 2, the "black star" is a (too tiny) black cross.
