

Interactive comment on “Simulations of direct and reflected waves trajectories for in situ GNSS-R experiments” by N. Roussel et al.

N. Roussel et al.

nicolas.roussel@get.obs-mip.fr

Received and published: 30 June 2014

Following the main point of the reviewer, many new calculations were done, and the text of the article was supplemented by new results. As attachment you will find - a pdf file with answers to the reviewer comments - the modified version of the article (RousselN_new.pdf) - a pdf file where modifications and corrections between the two versions of the article are highlighted (RousselN_corrections.pdf).

Please also note the supplement to this comment:
