Received and published: 1 September 2014

Please find attached the fig.1 corrected, now the colors of the legend are coherent with the curves. Thanks Emilie

Figure 1 – Graphical representation the mesophyll conductance (g_m), the coupling factor at saturating air humidity (f_0), the stomatal conductance (g_s), the evapotranspiration (LE) and the Gross Primary Production (GPP) for the four Water Stress Functions (WSF) used in this study against the SoilWetness Index (SWI).
