Received and published: 7 January 2015

Dear Professor Lunt,

Thank you for your comment.

All codes described in the paper are publicly available and are free/libre software. This includes the codes used to prepare all presented figures.

The paper already includes information on code availability (p. 8183 line 3): "The current version of libmpdata++ source code, including all examples presented herein, can be found at <http://libmpdataxx.igf.fuw.edu.pl/>. A current snapshot of the repository

C2874

is provided as a Supplement to the paper."

Both Referees described the library code as readily obtainable.

We will follow the guidelines explicitly and add a section entitled "Code availability" that will include the above-quoted sentences.

Kind regards,

Anna Jaruga
