Received and published: 8 February 2015

We do appreciate the positive comments by Referee #1. The referee fully understands the contents of our research. We agree with the referee's suggestion to include a description of the WRF-Chem. Following the referee's suggestion, we will include a short Appendix to describe the WRF-Chem in our revised manuscript. We recently applied this technique to a real data case, and will submit our results in a separate manuscript soon.
