Dear Jules,

Many thanks for editing this. In response to below please find revision with all acronyms defined at first usage. Changes are in red (pdf version only). There are also a few minor typo corrections, also in red.

Best wishes, Phil

Comments to the Author:
I like this paper and am happy to accept it for GMD.

I successfully downloaded the code but didn't get around to setting up any runs.

There are a lot of acronyms, and without really trying I found two that are undefined. I guess there are more. So, the technical correction is to check that all the acronyms are defined at first usage.
