

Dear editor,

We are glad that the paper is accepted subject to the listed technical corrections.

The version number of CVTRANS is now also mentioned in the text. However, we kept the equation number in the last sentence of the left column on the third page to 13, since Eq. (10) of Ouwersloot et al. (2013), $q_{cc} - \langle q \rangle = 0.53\sigma_{q,h}$, is not applicable here, while their Eq. (13), $\phi_{cc} - \bar{\phi}(z_b) = -1.23 (\bar{\phi}(z_b) - \langle \phi \rangle)$, does result in our Eq. (12) by considering that $\phi_{cc} = C_{\text{up}}^{k_b}$, $\bar{\phi}(z_b) = C_{\text{env}}^{k_b-1}$ and $\langle \phi \rangle = C_{\text{env}}^{k_b}$.

With kind regards,

Huug Ouwersloot
