Many thanks to the Editor and Reviewer for finding the coding inconsistencies/errors that caused Cloud-J to malfunction. This sloppy coding was unfortunately "accepted" by my compiler when I was developing Cloud-J. When corrected, the numerical calculation does not change, but it should now be more reliable across platforms. The corrected version 7.3b was posted on <ftp://128.200.14.8/public/prather/Fast-J> on 3 July. Notice was sent out via the uci-fast-j@uci.edu listserv. The figures and tables in this GMDD manuscript are not changed with version 7.3b.
