Dear authors,

As you will be aware, two referee reports have been submitted on your paper and the discussion phase is now complete.

Please respond fully to the comments and criticisms raised by the referees. Please note in particular that both referees raise the same strong concerns that: 1. the work described in the manuscript overlaps that previously published; 2. the manuscript does

C1454

not properly acknowledge this work. It is vital that these points are addressed in your revised manuscript. However, both also recognise the value of this type of study and are keen for such work to be published, and both have mentioned avenues by which the manuscript could be improved.

If you have any questions, please do not hesitate to contact me.

With best regards,

Andrew Yool.
