Received and published: 12 August 2015

Dear authors,

As you will be aware, two referee reports have been submitted on your paper and the discussion phase is now complete.

Please respond fully to the comments and criticisms raised by the referees. Note, in particular, that both referees raise the same strong concern that the reviewed draft of the manuscript does not describe the purpose and function of Metos3D clearly enough for potential users. Both referees went as far as to say that they were forced to effectively guess what was intended in places. They also raised a number of more spe-

cific points concerning omissions and clarifications. It is vital that these points are addressed in your revised manuscript.

If you have any questions, please do not hesitate to contact me.

With best regards,

Andrew Yool
