Dear author,

In my role as Executive editor of GMD, I would like to bring to your attention our Editorial:

[http://www.geoscientific-model-development.net/gmd\\_journal\\_white\\_paper.pdf](http://www.geoscientific-model-development.net/gmd_journal_white_paper.pdf)

<http://www.geosci-model-dev.net/6/1233/2013/gmd-6-1233-2013.html>

C1718

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the ‘Manuscript Types’ section:

[http://www.geoscientific-model-development.net/submission/manuscript\\_types.html](http://www.geoscientific-model-development.net/submission/manuscript_types.html)

In particular, please note that for your paper, the following requirements have not been met in the Discussions paper – please correct this in your revised submission to GMD.

“– All papers must include a model name and version number (or other unique identifier) in the title. ”

I appreciate that your manuscript type is "Technical/Development/Evaluation" rather than "Model Description", but it appears that you develop and describe an un-named model, hence this short comment.

Yours, Bob Marsh
