

Interactive comment on “WRF4G: WRF experiment management made simple” by V. Fernández-Quiruelas et al.

Anonymous Referee #3

Received and published: 10 September 2015

The authors have developed a scripting and monitoring system for running WRF, which might be generalised to other earth science models. Although this is welcome, it is not a development of the models or science per se, and I don't think it is suited to an academic paper.

Get the software out there, and if it is useful, people will adopt it.
