Received and published: 15 September 2015

Dear authors,

In my role as Executive editor of GMD, I would like to bring to your attention our Editorial:

http://www.geoscientific-model-development.net/gmd_journal_white_paper.pdf
<http://www.geosci-model-dev.net/6/1233/2013/gmd-6-1233-2013.html>

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the ‘Manuscript Types’ section: <http://www.geoscientific-model->

C1994

[development.net/submission/manuscript_types.html](http://www.geoscientific-model-development.net/submission/manuscript_types.html)

As your paper contains a considerable amount of model description, it is desirable that you meet the following requirements for a model description paper, which have not been met in the Discussions paper:

“– All papers must include a model name and version number (or other unique identifier) in the title.”

So please add a the models name (L95-GRS) and a version number to the title in your revised submission to GMD.

Yours,

Astrid Kerkweg
