Received and published: 26 March 2015

Dear Dan Lunt,

In the introduction of the discussion paper, the websites from which the code can be downloaded are listed (lines 10-13 of page 1379). Two websites are mentioned depending on the modeling framework in which PISCES is embedded: NEMO and ROMS-AGRIF.

Following your recommendation, we will add a specific section on the code availability in the revised version of the manuscript.

Yours, Olivier Aumont
