

Interactive comment on “Matching soil grid unit resolutions with polygon unit scales for DNDC modelling of regional SOC pool” by H. D. Zhang et al.

H. D. Zhang et al.

hdzhang@issas.ac.cn

Received and published: 2 April 2015

Thanks to #1 anonymous referee for your comments on the manuscript. You made a remarkable concise and exact comment, and gave a valuable evaluation to the manuscript. Of course, you also pointed out that the major weakness of this manuscript is language, and strongly suggested us to reorganize the manuscript with help from native English speakers. Good suggestion. We will invite native English speakers to improve the manuscript in language, eliminate grammatical errors, and ensure all sentences fluency before the manuscript printing normally. Thanks again! Dongsheng Yu (Corresponding author)
