

Interactive comment on “The importance of process interactions and parameter sensitivity for modelling the carbon dynamics in a natural peatland” by Christine Metzger et al.

Christine Metzger et al.

cmetzger@kth.se

Received and published: 9 October 2016

Thank you very much for the very detailed and constructive comments on the manuscript, which helped a lot to improve the paper. The responses to the overall and detailed comments are attached as supplement. The referee comments are in black letters, our responses in red itaclics and the indication of changes in the manuscript are marked bold.

Please also note the supplement to this comment:
