Received and published: 30 August 2016

Major comment: *Please name the COSMO model and provide a version number (e.g. COSMO X.Y-gpu) in the title in order to identify the code version this paper is based on. Please correct this upon revision of this article.*

Thank you for pointing out this issue. We changed the title according to the GMD guidelines and now also provide a version number.

The title now reads: “Towards European-Scale Convection-Resolving Climate Simulations with GPUs: A study with COSMO 4.19”

Please note that we also updated the Copernicus style file in the revised version of the manuscript.
