Thank you very much for pointing these journal guidelines out. Following them and Reviewer #1 suggestions we have changed the title of our article to: "Comparing some aspects of the ocean hydrography, circulation and sea ice between NEMO3.6 LIM2 and LIM3". We think this new title well describes the manuscript content and matches the GMD journal requirements.

Interactive comment on Geosci. Model Dev. Discuss., doi:10.5194/gmd-2016-187, 2016.
