

Interactive comment on “The Fire Modeling Intercomparison Project (FireMIP), phase 1: Experimental and analytical protocols” by Sam S. Rabin et al.

A. Kerkweg

kerkweg@uni-bonn.de

Received and published: 24 October 2016

Dear authors,

In my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1:

<http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html>

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the ‘Manuscript Types’ section:

http://www.geoscientific-model-development.net/submission/manuscript_types.html

C1

In particular, please note that for your paper, the following requirements have not been met in the Discussions paper:

- “Inclusion of Code and/or data availability sections is mandatory for all papers and should be located at the end of the article, after the conclusions, and before any appendices or acknowledgments. For more details refer to the code and data policy” (Editorial v1.1, Appendix A1)

Please first move the data availability section to the correct place in your revised submission to GMD. Note that it is not a numbered section. Additionally, please use this section to inform the reader where the data will be placed. Just telling that it will be made available is not enough.

Yours,

Astrid Kerkweg
