

***Interactive comment on* “Numerical Framework for the Computation of Urban Flux Footprints Employing Large-eddy Simulation and Lagrangian Stochastic Modeling” by Mikko Auvinen et al.**

Mikko Auvinen et al.

mikko.auvinen@helsinki.fi

Received and published: 8 June 2017

In the guidelines for Development and Technical Papers, it states the following: *If the model development relates to a single model then the model name and the version number must be included in the title of the paper.*

As the technical developments in the manuscript examine modelling processes that require joint operation of **two** models (PALM and P4UL), we wish to propose that the term 'Numerical Framework' would be more appropriate in the title. The model names, version numbers and accessibility information will be detailed in the Code Availability section.
