SC1: 'Executive Editor Comment on "An improved land biosphere module for use in reduced complexity Earth System Models with application to the last glacial termination", Astrid Kerkweg, 20 Jan 2017

Dear authors, in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1: http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html This highlights some requirements of papers published in GMD, which is also available on the GMD website in the 'Manuscript Types' section: http://www.geoscientific-model-development.net/submission/manuscript types.html

Printer-friendly version

Discussion paper

In particular, please note that for your paper, the following requirements have not been met in the Discussions paper:

• "The main paper must give the model name and version number (or other unique identifier) in the title."

In order to simplify reference to your developments, please add a model name (and/or its acronym) and a version number in the title of your article in your revised submission to GMD.

Yours, Astrid Kerkweg

Dear Astrid Kerkweg,

thank you for your comment. To address this we have now modified our title to read: "An improved land biosphere module for use in the DCESS Earth System Model (Version 1.1) with application to the last glacial termination"
