Thank you, the Executive Editor, for your important comment. We can include the version number (3.1) in the title. However, as it is mentioned in the title, the paper includes developments, so it would be preferably (as in many other papers in GMD) to mention the version number in the text, but not in the title. However, it is up to you, as the Executive Editor, to decide. We accept both options.

Interactive comment on Geosci. Model Dev. Discuss., doi:10.5194/gmd-2016-319, 2017.
