Received and published: 20 April 2016

Dear authors,

In my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1:

<http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html>

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the ‘Manuscript Types’ section:

http://www.geoscientific-model-development.net/submission/manuscript_types.html

In particular, please note that for your paper, the following requirement has not been met in the Discussions paper:

- "The main paper must give the model name and version number (or other unique identifier) in the title."

Please add a version number or other unique identifier for your model in the title upon your revised submission to GMD. Best of all you should provide version numbers for the WACCM model as well as for your own developments which are, if I understand correctly, not part of the official model version.

Additionally, I ask you to move the Code availability section in front of the Acknowledgements.

Yours,

Astrid Kerckweg
