Dear Authors,

as Executive Editor of GMD I appreciate that you comply with the Editorial of GMD by including the model name and version number in the title of your article.

Nevertheless, already the first line of the abstract and the Code Availability Section show, that the development published here is SURY (v.1.0). You already took the effort to name it and apply a version number. Thus I very much favour to name SURY in the title as well.

I suggest to change the title in a way like "The efficient urban canopy parametrization for atmospheric modelling (SURY v1.0): description and application with the COSMO-CLM model (version 5.0_clm6) for a Belgian Summer"

or "The Semi-empirical URban-canopY parametrization SURY (v1.0): description and application with the COSMO-CLM model (version 5.0_clm6) for a Belgian Summer"

Best regards, Astrid Kerkweg
