Response to SC4 by Malcolm Roberts

"In order to be consistent with the naming conventions for CMIP6, need to change:

highres-LAI to highresSST-LAI

highres-p4k to highresSST-p4k

highres-4co2 to highresSST-4co2

We recommend that the initial condition for the atmosphere and land for 1950 (for the highresSST-present, and perhaps the highres-1950 experiment) come from the ERA-20C reanalysis from January 1950."

C1

The naming is changed according to the CMIP6 conventions. The recommendation for ERA-20C reanalysis from 1950 is added in the manuscript.
