

The Radiative Forcing Model Intercomparison Project

Robert Pincus, Piers M Forster, and Bjorn Stevens

Response to the topical editor

We are grateful for the topical editor's quick assessment of our revisions and for his very careful reading of our manuscript. We have corrected the typographic errors. We have also changed the language at the beginning of section 4 to be clear that RFMIP-IRF assess both parameterization weakness (in the treatment of gases) and, indeed, errors (in the treatment of aerosols).
