Reply: The data set will be made available through the U.S. Forest Service Research Data Archive: <http://www.fs.usda.gov/rds/archive/>

The US Forest Service Research Data Archive contains the data set, complete meta-data for the data set(s), and any other documentation the researcher deemed important to understanding the data set(s). Each data is assigned a digital object identifier (DOI) identifying the content and providing a persistent link to its location on the Internet. The process of submitting / publishing a data set on the US Forest Service Research Data Archive typically requires two to three months. We have initiated the process.

Questions: 1. Do we need to submit a data set temporarily available during the review process?

C1

2. Must our data set be available in the US Forest Research Data Archive prior to publication in GMD?

I look forward to your advice.

Thanks, Wei Min Hao
