Received and published: 1 November 2016

I would like to thank Anonymous Referee #2 for their time to evaluate the manuscript. I appreciate if you see my replies to Referee #1 and #3 which also cover your concerns. 8 rain-gauge observation stations are analysed in this study, but only 3 of them are presented. I have added some results of the other 5 stations to the replies of Referee #1. I have also included Precipitable Water analyses as a process level evaluation (Please see replies to Referee #1).
