Dear authors,

in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1:

<http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html>

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the ‘Manuscript Types’ section:

http://www.geoscientific-model-development.net/submission/manuscript_types.html

C1

In particular, please note that for your paper, the following requirement has not been met in the Discussions paper:

- "The main paper must give the model name and version number (or other unique identifier) in the title."

Therefore, please add the version numbers of GRAMM/GRAL in the title of your article in your revised submission to GMD.

Additionally, I'd like to thank you for making the code publicly available. However, websites are often subject to change. Therefore the executive Editors of GMD highly recommend to make the exact code version to which the paper refers available via an archiving system providing a DOI (e.g. Zenodo). In this way, the code version and the paper are perfectly linked to each other.

Yours,

Astrid Kerkweg
