Dear Authors,

this is the wrong place for your request for a disclaimer.

"Since our discussion paper is already downloadable, we request you to add a disclaimer section in the content of the paper while it finishes review as per United States Geological Survey (USGS) policy. This is the content of the disclaimer section: This draft manuscript is distributed solely for purposes of scientific peer review. Its content is deliberative and pre-decisional, so it must not be disclosed or released by review-

ers. Because the manuscript has not yet been approved for publication by the U.S. Geological Survey (USGS), it does not represent any official USGS finding or policy."

First, I wonder, why you did not add this disclaimer yourselves, as you should have known, that you publish your article in a journal with public discussion before final release.

Second, changes to manuscripts can only be achieved by the publication office, so please ask them to add the disclaimer. However, usually manuscripts are not changed after they are online.

Best reagrds, Astrid Kerkweg
