Chunjing

As explained in [https://www.geoscientific-model-development.net/about/manuscript\\_types.html](https://www.geoscientific-model-development.net/about/manuscript_types.html) GMD is expecting that authors upload the program code of models and the used data sets as a supplement or make the code and data available at a data repository preferable with an associated DOI (digital object identifier) for the exact model version described in the paper. If for some reason your code and/or data cannot be made available in this form as the code availability section in your paper suggests you need to state the reasons why the code is not available or why access is restricted.

C1

Please note that in the code accessibility section you can still point the reader to your web site for updates even if you provide the code as supplement or use a DOI for a release.

All the best Lutz Gross GMD Executive Editor
