Xueran

As explained in [https://www.geoscientific-model-development.net/about/manuscript\\_types.html](https://www.geoscientific-model-development.net/about/manuscript_types.html) GMD is expecting that authors upload the program code of models as a supplement or make the code available at a data repository preferable with an associated DOI (digital object identifier) for the exact model version described in the paper. If for some reason your code cannot make available in this form as the code availability section suggests you need to state the reasons why the source code is not available.

C1

It is also not clear in which environment your implementation is implemented and what is required to run the code. Could you please clarify?

All the best Lutz Gross GMD Executive Editor
