As explained in https://www.geoscientific-model-development.net/about/manuscript_types.html any model description paper needs to have a “Code Accessibility” section. Please add this to your paper.

As also explained in this document GMD is encouraging that authors upload the program code of models (including relevant data sets) as a supplement or make the code

C1

and data or the exact model version described in the paper accessible through a DOI (digital object identifier). In case your institution does not provide the possibility to make electronic data accessible through a DOI you may consider other providers (eg. zenodo.org or CERN) to create a DOI. Please note that in the code accessibility section you can still point the reader how to obtain the newest version.

If for some reason the code and/or data cannot be made available in this form (e.g. only via e-mail contact) the “Code Accessibility” section need to clearly state the reasons for why access is restricted (e.g. licensing reasons).
