

Interactive comment on “Impact of numerical choices on water conservation in the E3SM Atmosphere Model Version 1 (EAM V1)” by Kai Zhang et al.

L. Gross

l.gross@uq.edu.au

Received and published: 22 December 2017

"Code Availability" does not outline any mean for the reader to obtain access to the program code as outlined in https://www.geoscientific-model-development.net/about/manuscript_types.html. The statement "The E3SM model source code is expected be released to the public in early 2018" is not sufficient. The authors may consider to hold the publication of the manuscript until the relevant version of E3SM has been released.

Lutz Gross GMD Executive Editor.
