Received and published: 15 March 2018

It is GMD policy that authors need to provide a persistent access to the exact version of the source code used for the model version presented in the paper. As explained in https://www.geoscientific-model-development.net/about/manuscript_types.html the preferred reference to this release is through the use of a DOI which is then cited in the paper. For projects in GitHub a DOI for a released code version can easily be created using Zenodo, see <https://guides.github.com/activities/citable-code/> for details. Please note that in the Code Availability section you can still point the reader to the GitHub repository for the newest version even if you use a DOI for the relevant release.
