

Interactive comment on “IPA (V1): A framework for agent-based modelling of soil water movement” by Benjamin Mewes and Andreas H. Schumann

Benjamin Mewes and Andreas H. Schumann

benjamin.mewes@hydrology.ruhr-uni-bochum.de

Received and published: 26 April 2018

We thank both referees for their useful suggestions and questions. We addressed each question and changed the manuscript accordingly. The questions the reviewers posed are of great interest and helped us to substantially improve our manuscript and our framework.

We compiled a document with detailed answers in the supplement of this post. For better readability we added the revised manuscript with the referee comment related changes colored in red (referee 1) and green (referee 2).

Please also note the supplement to this comment:
