Interactive comment on "High Performance Software Framework for the Calculation of Satellite-to-Satellite Data Matchups (MMS version 1.2)" *by* Thomas Block et al.

Thomas Block et al.

tom.block@brockmann-consult.de

Received and published: 25 July 2017

Dear Mr Gross,

thank you for your comment and the thorough review of the paper and software.

The text describes the general concepts and ideas of the software framework, therefore we did intentionally not assign a version number with a minor version. Those minor releasese track detail changes and improvements/extensions triggered by the current project work and do not alter the general concept. Nevertheless, we understand that the journal aims for a traceable connection of text, software and auxiliary

documents. We will update the publication in a way that all components refer to existing and downloadable entities; a DOI for the software release will be generated using project-conforming means.

With best regards,

Thomas Block
