Interactive comment on "High Performance Software Framework for the Calculation of Satellite-to-Satellite Data Matchups (MMS version 1.2)" *by* Thomas Block et al.

L. Gross

l.gross@uq.edu.au

Received and published: 20 July 2017

Thanks for your manuscript.

I had a look at the https://github.com/FIDUCEO/MMS/releases and I have notices that there is no release v1.2 but 1.2.0. Could you please make sure the the version referenced in the title and the manuscript corresponds to release number that actually exists?

I would also like to point out that GMD is strongly encouraging (but does not enforce) authors to provide persistent access to their program code and data used in

the manuscript. Typically this is guaranteed through the use of a DOI which for instance can be created for releases made in GitHub using Zenodo. The DOI should then be cited in the manuscript.

Many thanks.
